

UNIVERSITY OF ANTANANARIVO HIGHER SCHOOL OF AGRONOMIC SCIENCES

Unique public training establishment for Agronomists and Masters / Doctorate graduates in the field of Engineering Sciences, Agronomic and Environmental Sciences in Madagascar

AGRO-MANAGEMENT DEPARTMENT

- Offer innovative, attractive and effective training in agro- management
- Promote quality scientific research, visible and adapted to the needs of society
- Make the Department a framework for development and success for students
- Set up an efficient and unifying governance system for the Department
- Have human, financial and infrastructural resources to match our vision
- Revitalize national and international cooperation

The major challenges in Africa our unit is working on

- A context of population growth and decrease of natural resources is a major challenge for the university community
- The Agro-Management Department is developing quality agricultural research and training, visible and adapted to the needs of society, especially in rural areas, to reduce poverty and promote food security.

The major activities in the fields of governance and public policies in relation with our challenges

Produce agricultural engineers and Masters graduates having a scientific analysis and a critical mind, which makes it possible to bring a contribution and expertise in the development of the rural sector, support for strengthening the agricultural economy and conducting efficient research in the rural sector.
